

Abhinav Nallanagula

Software Engineer | Full Stack & Backend Developer

+91-8985665850 | abhinav14221@gmail.com | [GitHub](#) | [LinkedIn](#)

OBJECTIVE

Aspiring Software Engineer with B.Tech in CSE and practical expertise in full-stack development (React.js, Next.js, Node.js), RESTful APIs, MongoDB/SQL, OAuth, and AWS through internship and projects like Nexus and Soma Scents. Seeking entry-level role to deliver high-quality, scalable applications.

EXPERIENCE

Backend Developer Intern | AppOrigo Technologies

May – August 2025

Tech Stack: Node.js, React.js, MongoDB, Postman, Git, GitHub

- Built and maintained backend systems for **AdvocateUs**, a real-time web platform supporting multiple user roles.
- Designed and optimized RESTful APIs
- Added custom authentication and authorization, including Google and Facebook OAuth.
- Built automated web scraping utilities for data collection and content updates.
- Worked with frontend developers to design, integrate, and deploy new features.
- Conducted API testing using **Postman** and managed version control with **Git/GitHub**.

EDUCATION

Malla Reddy College of Engineering & Technology

2022 – Present

B.Tech in Computer Science Engineering | CGPA: 7.79/10

Sri Gayatri Junior College

March 2022

MPC | Score: 77.1%

Ravindra Bharathi School

March 2020

SSC | Score: 98%

PROJECTS

Nexus – Intra-College Web Platform (React.js, Spring Boot, AWS, SQL)

- Developed a comprehensive intra-college platform supporting communication, virtual classrooms, and assignments for students and faculty.
- Integrated secure authentication, authorization, and AWS-based cloud data storage for reliability.
- Built interactive dashboards and role-based access control for students, faculty, and administrators.
- Enhanced collaboration and engagement through a dynamic, responsive, and user-friendly interface.

Soma Scents – E-Commerce Website (Next.js, MongoDB)

GitHub: <https://github.com/githubabhinav14/Soma-Scents-Ecommerce-website-candles-business>

Live: <https://soma-scents-ecommerce-website-candl-three.vercel.app/>

- Built a complete e-commerce platform for a candle-selling business with product showcasing, cart functionality, and order handling.
- Integrated a secure backend using MongoDB to manage product data, customer details, and order tracking.

- Helped the business establish a strong digital presence and streamline its online sales process.

Aani Creations – Graphic Design & Printing Services Website (Next.js)

GitHub: <https://github.com/githubabhinav14/Aani-Creations> | **Live:** <https://aani-creations.vercel.app/>

- Developed a professional company website to promote Aani Creations' graphic design and printing services.
 - Focused on clean, modern design, branding consistency, and optimized performance for fast loading times.
 - Implemented responsive layouts and interactive elements to improve user engagement and user experience.
 - Built an intuitive admin panel enabling easy content updates, service listings, and portfolio management.
-

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript

Frameworks: React.js, Next.js, Node.js

Core Concepts: OOP, DBMS, RESTful APIs

Databases: SQL, MongoDB

Tools: Git, GitHub, Postman, VS Code

Operating Systems: Windows

Google Cloud Arcade – Level 3 (2024): Completed advanced hands-on labs on Google Cloud technologies.

GenAI Solution Challenge – GDG (2024): Recognized for developing AI-driven solutions using Google Cloud.

Best Designer Award – University Fest: Awarded for creativity and design excellence during B.Tech.

Letter of Recommendation – AppOrigo Technologies (2025): For outstanding internship performance.

Machine Learning Training – Intel® Unnati Lab (2024): Completed a 3-day practical ML training program.

AI & ML Workshop – IIT Hyderabad (2024): Participated in applied AI and ML sessions.

SOFT SKILLS

Problem-Solving • Collaboration • Time Management • Adaptability • Critical Thinking • Communication

HOBBIES

Designing/Editing • Badminton • Driving
